What is a Destiny Matrix Chart? A destiny matrix chart is a visual diagram that maps out different facets of an individual's destiny. Unlike traditional charts that focus solely on astrology or numerology, the destiny matrix integrates multiple systems to provide a comprehensive overview. It typically contains various sections or segments, each representing specific life themes such as career, relationships, health, spiritual growth, and more. The main purpose of a destiny matrix chart is to identify strengths, challenges, opportunities, and potential future developments. It serves as a guide for personal decision-making, self-awareness, and aligning one's actions with their higher purpose.

Structure of a Destiny Matrix Chart Understanding the structure of a destiny matrix chart is crucial for accurate interpretation. While designs may vary depending on the system used, most charts share common elements:

- 1. Core Personal Attributes** - Life Path Number or Core Destiny Number: Derived from your birth date, indicating your overall life theme. - Expression or Destiny Number: Reflects your talents, abilities, and natural tendencies. - Soul Urge Number: Reveals your inner desires and motivations.
- 2. Life Aspects or Segments** - Divided into sections such as: - Career & Finances - Love & Relationships - Health & Well-being - Spirituality & Personal Growth - Family & Home - Social Life

Each segment contains specific symbols, numbers, or color codes that provide insights into that

area. 2 3. Planetary or Numerological Symbols - Incorporate planets, zodiac signs, or numerological vibrations to add depth. - Symbols indicate influence levels, challenges, or opportunities within each life aspect. 4. Timing or Cycles - Some charts include time-based elements such as cycles, age-specific influences, or planetary transits that suggest when certain themes are more prominent.

How to Interpret a Destiny Matrix Chart

Interpreting the chart involves analyzing the components and understanding their interrelations. Here are the essential steps:

Step 1: Identify Your Core Numbers Begin by calculating and noting your core numerology numbers:

- Life Path Number: Sum of your birth date digits, reduced to a single digit or master number.
- Expression Number: Derived from the full name at birth.
- Soul Urge Number: Vowels in your full name.

These numbers form the foundation of your destiny profile and are often highlighted at the center or top of the chart.

Step 2: Examine Each Life Aspect For each segment:

- Observe the symbols, colors, or numbers present.
- Note any recurring themes or prominent influences.
- Consider how these elements relate to your core numbers. For example, a career segment featuring a specific planet might suggest a favorable period for new opportunities.

Step 3: Analyze Relationships Between Components - Look for patterns or correlations between different sections.

- For instance, a strong numerology number in spiritual segments paired with a planetary influence could indicate a significant spiritual growth phase.
- Recognize areas where challenges may exist, such as conflicting symbols or low vibrational numbers.

Step 4: Pay Attention to Timing and Cycles - Many destiny matrix charts include timing indicators.

- Use these to anticipate periods of growth or challenge.
- Align your actions with favorable cycles for better results.

Step 5: Synthesize the Information - Combine insights from core numbers, life aspects, symbols, and timing.

- Develop a holistic understanding of your current life situation and future potential.
- Use this knowledge as a guide for making informed decisions.

transcendental coaxiological mathematics gives each number not only an abstract identity but a living one due to the imprint that each number leaves both in our surrounding universe and in other universes whether they are parallel or not this imprint is due to the fact that each number in turn represents a creator factor and unique incidentally which represents the meaning of a certain word therefore understood which in turn is part of the universal pure language the totality of the words from the universal pure language constitutes the unique expression of the universal consciousness these imprints

can be identified to some extent by transcendental numbers or by transcendental functions which prove that certain values cannot be changed to obtain some ideational representations such as the example circle whose coordinates are definitively influenced by the transcendental number π in the future surely many transcendental numbers will be discovered that will help mankind to identify through mathematics not only abstract representations but even states of soul each number represents a different identity depending on the universe in which it is located in the essence of each number is the creator factor and unique incidentally which governs its essence that defines the soul of the respective number that is of the creator factor and unique incidentally that represents the number in question transcendental coaxiological mathematics is the one that defines the processes of the universal pure language whose words in turn are each in part the expression of a creator factor and unique incidentally that is of a number whose totality defines the universal unique consciousness through transcendental coaxiological mathematics the science of mathematics becomes from an abstract discipline a living one which receives soul which in turn gives to mathematics and a humanistic side thanks to transcendental coaxiological mathematics in the future we will be able to talk and about a mathematics of spiritual feelings such as religion love hate happiness sadness pain pride courage etc transcendental coaxiological mathematics will be able to solve many mysteries of the human soul in the future being the only link that can build a bridge between us and the truth that is so unknown to us because everything we live and feel is due to the illusion of life transcendental coaxiological mathematics will be the literature of the future of artificial intelligence at the basis of transcendental coaxiological mathematics is semantic coaxiology but also coaxiological logic these fields of coaxialism transcendental numbers such as the number π for example prove to us concretely that transcendental coaxiological mathematics exists by the fact that there is a link of concrete causality between the geometrical representation of the circle and the transcendental number π the number π can never be neither smaller but nor larger than 3.14 to become operational in the calculations related to the circle while the circle is a geometric figure that has an active role in human knowledge and feeling here is one of the links that proves to us that transcendental coaxiological mathematics

exists and that it only needs to be developed through my philosophical works i have tried to lay the foundations of what transcendental coaxiological mathematics means from a philosophical point of view and how it can be determined the principles of my philosophical system called coaxialism as well as those of coaxiological logic are in law and de facto in turn the basic principles of transcendental coaxiological mathematics transcendental coaxiological mathematics is a bridge between us who are lost in the illusions of life with the absolute truth in transcendental reality there are an infinity of transcendental numbers only that we will not be able to know them with the reduced capacities of our present brain a brain that thinks only with about a tenth of its capacity which has been attributed to it by natural evolution maybe somewhere in our distant history there was a genetic accident more precisely a genetic intervention from the exterior on the human genome an intervention that led to the constraint of using the full capacity of our brain for reasons unknown to us nature never makes an organ evolve without any meaning but with a certain purpose in the case of our brain the purpose being that to think and perceive through it the world thus we can say that somewhere in the mists of history our ancestors had other abilities to discern the world from us returning to the transcendental numbers which are revealed to us only a few of their infinity as many as would exist in reality every object thing phenomenon or physico chemical process that surrounds us is the work of transcendental numbers which one day we will discover with the help of artificial intelligence only then will we be able to talk about mathematical psychology the one which will become the basic branch of transcendental coaxiological mathematics even a poem or a song will be understood through transcendental numbers and transcendental coaxiological mathematics the time will come when the letters that make up literary pages can be replaced with numbers which we will understand and feel same like some words only that for this we will have to develop our own brain on another level a thing that is possible with the help of artificial intelligence in the future transcendental functions and transcendental numbers will be the ones that will form the backbone of transcendental coaxiological mathematics in relation to the process of knowledge a field that will have to be developed especially by artificial intelligence what is known so far about these transcendental functions according to the

encyclopedia britannica is that i quote in mathematics a transcendental function is an analytic function that does not satisfy a polynomial equation in contrast to an algebraic function in other words a transcendental function transcends algebra in that it cannot be expressed in terms of a finite sequence of the algebraic operations of addition subtraction multiplication division raising to a power and root extraction end quote examples of transcendental functions include the exponential function the logarithm and the trigonometric functions

with the appearance of my first philosophical studies but also of aphorisms i initially published the book entitled bible of the light and then a more complete form of the book bible of the light was the book entitled the illuminati bible so that in present to publish the full form of the bible which i felt that it will be perfected with the help of god and which i decided to call the illuminati bible of divine light some will wonder why i chose this name of the illuminati bible starting with that book published in 2014 the content of which is also in this book called the illuminati bible of divine light which in turn contains many other parts simple firstly because i wanted to help in good the karma of this world because illuminati and enlightenment are spoken of in negative terms and secondly because illuminati comes from enlightenment and true enlightenment cannot bring the evil nor can it be the evil vile true enlightenment must be based only on good and never on bringing the evil as the supreme wickedness therefore in order to improve the karma of mankind i show that enlightenment does not consist in wickedness but in combating wickedness the enlightened ones cannot be a hidden group of people who lead humanity out of the shadows committing all sorts of evils and abuses to maintain power these people are by no means enlightened but dark if there really are some in such a situation then they use the term illuminati or enlightened falsely how just as dark are those who dirtyly attack on the true illuminati or enlightened only out of obscure interests of a religious nature for fear that the enlightened ones might open the souls of the people and show them the way to the truth from which some high prelates that are at the head of certain churches flee who are afraid that if the truth would be found they will lose both their financial and their decision making power i believe that the future will belong

to those truly enlightened the true illuminati a thing is to use evil to bring through it good and another is to use evil to bring through it the wickedness the true enlightened and not dark are those who understand that the evil can only be used for good when he can do it and the good only for the evil less evil when the good itself can lead to destruction disaster or pain the real bad people the dark ones are the ones who use both good and evil to do as much as possible evil and not good mankind must understand that the evil and good the god and the devil are an entity with two distinct characteristics an entity that defines our true god that is our creator factor and unique incidentally therefore in order to improve the karma of this world we will have to pray to the universal consciousness formed by the universal pure language that is to pray to the divine light of all the worlds the supreme god of intelligence which to inspire our thoughts so that to use in moderation both good and evil for the ultimate purpose of doing and bringing through us as much as possible good why didn't I let in continuation the name of the illuminati bible and to this new much deeper work of the bible and call it the illuminati bible of divine light because compared to the other book called the illuminati bible the illuminati bible of divine light contains in addition to the content of that book many other new chapters that appeared with the new wisdom collections or with the final form of the coaxialism sorin cerin
