traditions are dangerous doubly so in science traditions are unchanging science is about change this was the 4th international colloquium on carbohydrate metabolism in pregnancy and the newborn to be held in aberdeen and by now the form is set how much its content has changed is a matter of nice judgement and not under the control of the organizers it is not within their power to bring news of revolution if there has been no revolution certainly many of the speakers had kent faces from previous aberdeen meetings but so they would be at any meeting on diabetes anywhere in the world the written proceedings of scientific conferences have purposes other than to record changes sometimes they need to state a colloquium came to an agreement about the importance of prepregnancy recognition and control of abnormalities of carbohydrate metabolism the 4th set out to examine what results it had achieved much of this book is taken up with follow up studies of the applications of similar regimes in different parts of the world since the first aberdeen meeting in 1973 progress in the management of diabetic pregnancy has been slow and steady but the change in the city and the society where the meetings took place has been fast

second international colloquium on carbohydrate metabolism in pregnancy and the newborn 1978

this book is a collection of the latest data and papers on neurological disorders during pregnancy these complicated and difficult conditions require a multi disciplinary approach to treatment which may either be surgical intervention or medical management for women in the reproductive age group the diagnosis of neurological disorders during pregnancy or post partum creates further challenges taking motivation from the editor s successful management for pregnant cases with neurological disorders this book is intended to guide the neurosurgical community towards better management of treating neurological disorders in pregnancy
