during the 1975 76 academic year jacques derrida delivered a seminar la vie la mort life death at the

École normale supérieure in Paris based on archival translations of this untapped but soon to be published seminar the reproduction of life death offers an unprecedented study of Derrida's engagement with molecular biology and genetics particularly the work of the biologist François Jacob structured as an itinerary of three rings each departing from and coming back to Nietzsche Derrida's seminar ties Jacob's logocentric account of reproduction to the reproductive program of teaching that characterizes the academic institution challenging this mode of teaching as auto-reproduction along with the concept of academic freedom on which it is based Maccance also brings Derrida's critique of Jacob's theory of auto-reproduction together with his reading of reproductivity the tendency to repeat reproduce that is theorized and enacted in Freud's beyond the pleasure principle the book further shows how Derrida's account of life death relates to his writings on autobiography and the signature and to such later concerns as the question of the animal Maccance brings extensive archival research together with a deep knowledge of Derrida's work a background in genetics to offer a fascinating new account of an encounter between philosophy and the hard sciences that will be of interest to theorists in a wide range of disciplines concerned with the question of life
